Summary

Wyatt Salmons is a full stack web developer from Albuquerque, NM. Wyatt is currently developing a fast, unbiased, mobile-oriented, query platform which searches local events in the city of Albuquerque.

Experience

Presbyterian & Albuquerque Ambulance Service / AEMT
Dec 2015 - Dec 2018
Provided prehospital advanced life support, critical care, and 911/non-emergent transport to the communities of Albuquerque, Bernalillo County, Corrales Village, and the surrounding area.

ScribeAmerica / ER Scribe
June 2015 - Dec 2015
Documented physician assessment findings, history of present illness, and conducted physician to physician consults.

Salmons PC / 3D BIM Modeler/Drafter
July 2010 - May 2015
Created final construction drawings based on contract drawings from the client's architect, and engineering calculations. Modeled and helped with coordination of large scale BIM projects.

Education

CNM / Deep Dive Coding Bootcamp Certification
Jan 2019 - March 2019
Learned frontend and backend coding languages in an immersive +400 hr work-like environment. Created several websites including Abq at Night, a local search engine geared at a fast, simple, and light approach to finding local entertainment.
